PROFILE

Product-minded UI/UX Designer with 5+ years of experience and a strong focus on product thinking, visual craft and scalable design systems. Currently UI/UX Designer and Product Owner at Umain, leading the creation of CUPOLA, the company's new suite that brings previously standalone AI products into a single platform clients manage on their side, without a new installation for each product. Built a new design system for the company's products, with usage rules, guidelines and do's and don'ts, cutting internal product development time by around 50%. As Product Owner of one of Umain's internal products, owns the product vision and balances user needs, business goals and technical constraints. Works end to end with engineering-heavy teams in Agile/Scrum and is AI-native in approach, using AI tools to explore ideas and build functional prototypes beyond Figma.

EXPERIENCE

03/2024 – Present

UI/UX Designer & Product Owner

UMAIN WORKS, Lda.

- Took on the **Product Owner role for one of Umain's internal products**, owning the product vision and balancing user needs, business goals and technical constraints.
- Led the creation of **CUPOLA**, the company's new product suite, bringing previously standalone AI products together so clients can use several of them without a new installation for each, managing everything on their side.
- Created a new design system for the company's products (components, variants, usage rules, guidelines and do's and don'ts), **cutting internal product development time by around 50%** and making the developers' work faster and more consistent.
- Partnered closely with product managers and engineers within Agile/Scrum frameworks to understand the problem, the user and the journey, delivering MVP products and iterating based on user data.
- Produced high-fidelity UI with close attention to typography, layout, hierarchy and usability, plus detailed documentation that streamlined the implementation of complex interaction flows and components.
- Used AI tools such as Lovable to explore ideas and build functional prototypes beyond Figma, accelerating concept validation with stakeholders and engineering.

03/2021 – 06/2024

UI/UX Designer

ITCENTER

- Led the design of mobile applications and communication platforms, optimizing user journeys for efficiency and speed.
- Spearheaded the redesign of legacy systems with a focus on usability and compliance with digital accessibility (WCAG) standards.
- Created interactive prototypes in Figma to validate concepts with stakeholders and test high-density data visualizations.

SKILLS

Product design	UI/UX design, product thinking, information architecture, interaction design, user flows, prototyping, typography and layout, data visualization
Design systems	Figma (expert), components, variants and shared styles, cross-platform consistency, design documentation and developer handoff
Product & process	Agile/Scrum, product discovery, product ownership, roadmapping, backlog and user stories, user research, usability testing, client demos
Accessibility	WCAG and EAA standards, inclusive design, accessibility evaluation methods
AI workflow	AI-assisted ideation and prototyping with Figma AI, Google Stitch, Lovable and Claude, functional prototypes beyond Figma, UX design for AI products
Tools	Figma, Figma AI, Lovable, Google Stitch, Claude (Design and Code), Notion, Storybook

EDUCATION & CERTIFICATIONS

03/2026	Digital Accessibility for Product Teams (workshop) · uiux.pt
06/2025	Usability and User Experience for AI-driven Digital Products (workshop) · uiux.pt
2016 – 2019	B.Sc., New Communication Technologies · University of Aveiro

LANGUAGES	Portuguese (native) · English (good communication)
INTERESTS	Sports and outdoor activities, reading, cinema and music, traveling, vegetable gardening
